### COVID Updates:

2020 classes have been cancelled

We are open with full staff and implementing safety precautions. For safety reasons and law compliance, please schedule any visits and meetings with a salesman so we can limit the amount of people in the building during the COVID outbreak.

### Polara iNS2

iNavigator Passive Pedestrian Push-button 2-Wire Push Button Station

- Touch-less actuation
- Inconspicuous radar detection - vandal resistant
- Detects movement typically within 1-4 inches
- PedApp smartphone app

### iNS2

The "iNS" iNavigator 3-Wire Push Button Station (iNS3 PBS) is the pedestrian interface to the iNavigator Accessible Pedestrian System. A system consists of a Ped Head Control Unit (iPHCU3S) and a Push Button Station.

The iNS PBS is MUTCD compliant and provides valuable information and cues via both a vibrating arrow button and audible sounds, making the intersection accessible for all pedestrians. All sounds emanate from the front and back of the unit.

A sunlight-visible red LED latches "ON" along with a tactile feedback "bounce" to confirm the button has been pushed.

The vandal resistant design of the iNS PBS includes the body, which houses the ADA compliant push button (shown), a faceplate (5X7 sign shown), and mounting hardware.

[PedApp - Smartphone App](#)

Helpful for visually impaired pedestrians and useful for all other pedestrians. The PedApp allows button actuation from phones via Bluetooth wireless technology. It works with "text to speech", for additional accessibility.

The app provides information on the location and direction of the intersection crossing as well as indications such as don't walk, walk, ped clearance, and an audible countdown.

Agencies can control the app's usage at intersections and it is recommended that agencies use/implement the app at pedestrian requested APS sites.

Carrier & Gable is the distributor for Lumecon LED lighting products for both Michigan and Indiana. Lumecon's team of experts specialize in converting existing decorative lighting fixtures to LED and supplying the right fixtures for any job. See the attached catalogs for lighting solutions to save power and maintenance in your community!

All Lumecon products are proudly made in Michigan and come with a standard 10 year warranty.

The WindMaster T1260M sign stand is designed for rugged performance and durability. It is designed to hold a standard roll-up or rigid sign.

- Folds for easy handling and convenient storage
  - Designed to accommodate most roll-up and rigid signs
  - Kick-release individually adjustable legs for stability on curbs and uneven terrain
  - Telescoping legs for increased wind performance
  - MASH - tested
  - Weight: 32 lbs
- 48" roll-up sign height: up to 60" from bottom of sign
  - 48" rigid sign height: up to 25" from bottom of sign

- Steel base and spring components specially coated to withstand 240 hours of salt spray
- Aircraft aluminum alloy legs and uprights, with anti-skid rubber leg caps
- Dual spring base with strong initial tension resists twisting and turning of sign in high wind gusts

**RIGID SIGN BRACKETS – SA-01729**

Secure signs up to ¾" thick.  
Two brackets are required per sign.

**METAL ADJUSTABLE ROLL-UP MOUNTING BRACKET – SA-16780**

Accommodates any roll-up sign with standard 1¼"-wide fiberglass crossbracing.
